

2014 REPORT ON THE STATE OF THE ART OF RARE DISEASE ACTIVITIES IN EUROPE

STATE OF THE ART OF RARE DISEASE ACTIVITIES IN ICELAND

This work was financed by the EUCERD Joint Action: Working for Rare Diseases N° 2011 22 01

This document has been produced by the Scientific Secretariat of the European Union Committee of Experts on Rare Diseases (EUCERD) Joint Action through the EUCERD Joint Action: Working for Rare Diseases (N° 2011 22 01, Coordinator: Kate Bushby, University of Newcastle, United Kingdom), within the European Union's Second Programme of Community Action in the Field of Health.

The European Union Committee of Experts on Rare Diseases (EUCERD) was established in 2009 and its mandate ended in 2013. It is replaced from 2014 by the Commission Expert Group on Rare Diseases. The EUCERD Joint Action continues to support the activities of the new Expert Group until 2015.

More information on the activities of the former European Union Committee of Experts on Rare Diseases and the EUCERD Joint Action can be found at www.eucerd.eu.

GENERAL INTRODUCTION

This document was produced by the Scientific Secretariat of the European Union Committee of Experts on Rare Diseases (EUCERD), through the EUCERD Joint Action: Working for Rare Diseases (N° 2011 22 01), which covers a three year period (March 2012 – February 2015).

The European Union Committee of Experts on Rare Diseases (EUCERD) was established in 2009 and its mandate ended in 2013. It is replaced from 2014 by the Commission Expert Group on Rare Diseases. The EUCERD Joint Action continues to support the activities of the new Expert Group until 2015.

More information on the activities of the former European Union Committee of Experts on Rare Diseases and the EUCERD Joint Action can be found at www.eucerd.eu.

The present report aims to provide an informative and descriptive overview of rare disease activities at European Union (EU) and Member State (MS) level in the field of rare diseases and orphan medicinal products up to the end of 2013. A range of stakeholders in each Member State/country have been consulted during the elaboration of the report, which has been validated as an accurate representation of activities at national level, to the best of their knowledge, by the Member State/country representatives of the Commission Expert Group on Rare Diseases. The reader, however, should bear in mind that the information provided is not exhaustive and is not an official position of the European Commission, its Agencies or national health authorities.

The report is split into six parts:

Part I: Overview of rare disease activities in Europe

Part II: Key developments in the field of rare diseases in 2013

Part III: European Commission activities in the field of rare diseases

Part IV: European Medicines Agency activities and other European activities in the field of rare diseases

Part V: Activities in EU Member States and other European countries in the field of rare diseases

Part VI: Activities at National level in each EU Member State and other European countries in the field of rare diseases

Parts I – V also include a description of the methodology, sources and validation process of the entire report, and a selected bibliography and list of persons having contributed to the report.

The present document contains the information from Parts II and V of the report concerning Iceland. A list of contributors to the report and selected sources are in annex of this document. For more information about the elaboration and validation procedure for the report, please refer to the general introduction of the main report.

Each year, there are around 15 000 downloads of the different sections of the report combined.

RARE DISEASE ACTIVITIES IN ICELAND

Definition of a rare disease

In Iceland a condition is defined as rare if it affects 2 or fewer individuals per 10 000.

National plan/strategy for rare diseases and related actions

In Iceland there is not yet a specific plan for rare diseases. In 2012, for the first time, Iceland was able to send a representative to a EUCERD meeting, which increased discussion and awareness of rare diseases in Iceland at the level of the Ministry, stakeholders and rehabilitation services. Representatives from these organisations now meet regularly with the purpose to increase awareness of rare diseases within the country. A plan for rare diseases is being defined by a working group with the cooperation of stakeholders. A strategy for disabilities was launched in 2012 and the plan is to revise this document in a few years and include a chapter on rare diseases within it. Currently, there is no specific funding in place for rare diseases.

Centres of expertise

Up to now, no centres in Iceland have been designated as national centres of expertise. However, since 1986 one national habilitation centre provides services for children and adolescents with conditions leading to disability, including rare diseases and syndromes. The same accounts for diagnostic and habilitation services for visually impaired and hearing impaired children and adults including those with rare diagnosis. These services are centralised at two national centres. Administrative databases designed to collect and store data on causes of disability (including rare diseases/syndromes) are developed at these three centres and updated regularly. The plan is to further enhance services for individuals with rare diseases at these centres.

Registries

In Iceland there is no formal national committee dedicated to dealing with registries but administrative databases (see above) are organised by directors of the individual national centres. In 2012, a centralised database on causes of deaf blindness (combined hearing and visual impairment) among Icelandic children and adults was established in cooperation of these three national centres servicing people with disabling conditions. These administrative databases are financed by the state. In addition, Icelandic teams contribute to the EURO CARE CF and RARE CARE European registries.

Neonatal screening policy

There have not been any developments in the neonatal screening policy in 2012 nor have there been additions to the list of rare diseases tested. Since 1 January 2008 neonates in Iceland have been screened for 42 different rare diseases using tandem mass spectrometry.

Genetic testing

Genetic testing (as well as genetic counseling) in Iceland is centralised at the Department of Genetics and Molecular Biology of the National University Hospital of Iceland. Other than guidelines regarding the newborn screening, Iceland does not have national guidelines regarding genetic testing. Genetic testing abroad is possible as specimens are frequently sent abroad for advanced testing which is not possible to perform in Iceland. The patients pay only a small proportion of the total cost of genetic testing (universal health care system) but there are no specific provisions in place for patients with rare diseases.

National alliances of patient organisations and patient representation

In Iceland there is one patient organisation focusing on children with rare diseases and their families. The organisation is called "Unique children". In 2012, collaboration was initiated between representatives from the organisation "Unique children", the Ministry of Welfare and the national habilitation centre with the aim to increase awareness of rare diseases at all service levels in the country.

Sources of information on rare diseases and national help lines

Orphanet activities in Iceland

There is no Orphanet team in Iceland.

Official information centre for rare diseases

In Iceland there is no official information centre for rare diseases. However, the patient organisation, Unique Children, provides information regarding rare diseases and the Nordic cooperation Rarelink (with its Icelandic link, www.rarelink.is) provides information on hundreds of rare diseases (either in the Nordic languages or English). Rarelink also offers networking for people with rare diseases i.e. people can get information on others within the Nordic countries with the same diagnosis. The organisation Unique Children is not funded by the state but by donations and specific fundraising activities.

Help line

There is no rare disease specific helpline in Iceland.

Other sources of information

Iceland has taken part in Nordic activities regarding rare diseases during the past several years. In autumn 2011 the homepage www.rarelink.is was launched and since 2012 information regarding several rare diseases and syndromes has been translated into the Icelandic language and published on this website.

Guidelines

Best practice guidelines for rare diseases have not been produced in Iceland.

Training and education initiatives

No specific activity reported.

National rare disease events in 2013

The organisation Unique Children celebrated the Rare Disease Day 2013. This year the organisation donated money to the Children's Hospital in Iceland and to Rjodur which is a centre offering respite care and rehabilitation services for chronically ill and disabled children.

Hosted rare disease events in 2013

No specific activity reported.

Research activities and E-Rare partnership

Research activities

There are no specific programmes for rare diseases research in Iceland and there are not any fund-raising initiatives for rare diseases research in Iceland.

Participation in European research projects

Teams in Iceland have participated in 31 rare disease related FP7 projects and 2 projects are coordinated in Iceland.

E-Rare partnership

Iceland is currently not an E-Rare partner and has not yet participated in these calls.

IRDIRC

Icelandic funding agencies are not yet committed members of IRDiRC.

Orphan medicinal products

Orphan medicinal product committee

In Iceland there is no orphan drug committee and there are no official plans to introduce one.

Orphan medicinal product incentives

No specific information reported.

Orphan medicinal product market availability situation

No specific information reported.

Orphan medicinal product pricing policy

No specific information reported.

Orphan medicinal product reimbursement policy

No specific information reported.

Other initiatives to improve access to orphan medicinal products

No specific information reported.

Orphan devices

No specific information reported.

Specialised social services

A new information centre for children with rare disease and their families was opened in Autumn 2012. The centre is called Leiðarljós (Guiding Light) and offers parents of children with rare diseases nursing services, social support as well information regarding available services.

DEVELOPMENT OF RARE DISEASE ACTIVITIES IN 2013 IN ICELAND

National plan/strategy for rare diseases and related actions

In 2012, for the first time, Iceland was able to send a representative to a EUCERD meeting, which increased discussion and awareness of rare diseases in Iceland at the level of the Ministry, stakeholders and rehabilitation services. Representatives from these organisations now meet regularly with the purpose to increase awareness of rare diseases within the country. A plan for rare diseases is being defined by a working group with the cooperation of stakeholders. A strategy for disabilities was launched in 2012 and the plan is to revise this document in a few years and include a chapter on rare diseases within it. Currently, there is no specific funding in place for rare diseases.

National rare disease events in 2013

The organisation Unique Children celebrated the Rare Disease Day 2013. This year the organisation donated money to the Children's Hospital in Iceland and to Rjodur which is a centre offering respite care and rehabilitation services for chronically ill and disabled children.

Specialised social services

A new information centre for children with rare disease and their families was opened in Autumn 2012. The centre is called Leiðarljós (Guiding Light) and offers parents of children with rare diseases nursing services, social support as well information regarding available services.

LIST OF CONTRIBUTIONS¹

Contributions in 2013

Solveig Sigurdardottir (*State Diagnostic and Counselling Centre*)
Thor Thorarinsson (*Ministry of Welfare*)
Gudmundur Björgvin Gylfason (*Unique Children*)

Contributions in 2014

Solveig Sigurdardottir (*State Diagnostic and Counselling Centre*)
Thor Thorarinsson (*Ministry of Welfare*)
